

KEEP YOUR NOSE CLEAN FROM ALLERGENS AND GERMS WITH RINOSIL ORIGINAL

Medical device

Spray 20ml

DESCRIPTION:

Seawater nasal spray removes so called “dry nose” sensation, restores ability to breath freely and helps clean the nasal passages easily:

1. In dry air conditions, including rooms where heating or air conditioning systems work;
2. In case of intense pollen or household dust accumulation.

SUGGESTED USE:

Spray in each nostril 1–2 doses a day.
Recommended for adults and children (2+ years).

LIST OF ACTIVE INGREDIENTS:

- ISOTONIC SOLUTION WITH SEA SALTS - correspond with 0.9 % sodium chloride solution.

The mucous membranes that line your nose and sinuses can become swollen and congested in response to viruses, allergies, and bacteria. In response, your nose and sinuses produce more mucus in an attempt to protect you. If your nasal and sinus secretions are too dry, sinus pain, nasal congestion, sinusitis, and other symptoms can develop.

Upper respiratory tract infections and sinonasal symptoms are frequent complaints, especially in children. Nasal irrigation with isotonic saline solutions seems effective in such health conditions and is often used in a variety of indications as an important component in the management of sinonasal complaints or just adjunctive treatment ⁽¹⁾.

Nasal irrigation isotonic saline solutions improves symptoms of allergies and often decreases the amount of prescribed medication ⁽²⁾.
